

There are many benefits of using MAXOUT. MAXOUT helps maintain aquarium PH levels by keeping them stable and consistent. The high capacity carbon removes organics and polishes aquarium water. MAXOUT removes all toxins, metals and odors in the water column. The proprietary resins are unique to the MAXOUT blend and aids in the removal of phosphates and reduces the buildup of algae and organics. Let MAXOUT clear your water and help balance your parameters today.

DIRECTIONS

To use the product simply place the mesh filter bag within a high flow area of your filtration system. The media is compatible within both canister filters and standard sumps. For maximum effectiveness, replace MAXOUT every 30-60 days.

WARNING

Use only for aquariums. Keep out of reach of children.
