

SLIME OUT removes Cyano bacteria blooms in the aquarium. The combination of organic scavenger resins, SLIME OUT will efficiently help you battle this nuisance bacteria bloom. SLIME OUT removes all toxins, metals and odors in the water column while simultaneously providing bacteria that oxygenates the water column. SLIME OUT aids in the removal of phosphates and reduces the buildup of algae and organics. SLIME OUT cannot be regenerated and is to be disposed of once the product has been exhausted.

#### DIRECTIONS

Place SLIME OUT in a high flow area of the filter chamber. Do NOT Overdose. Product will begin working immediately. Please remove SLIME OUT after two weeks of treatment and perform a 20% water change. Using reverse osmosis water is recommended. Repeat treatment if Cyano bacteria is still visible. Do not exceed two treatments per month.

#### WARNING

Use only for aquariums. Keep out of reach of children.
